The Foundation of Our Business

Management Philosophy of Field International Group

We aim to exceed the expectations of stakeholders and communities through the pursuit of our corporate vision and mission, acting in accordance with our values which form the foundation of our business decisions.

VISION

Build better futures by overcoming the most complex,
profound challenges, everywhere

MISSION

We aspire to be the leading team, with consistent commitment towards tomorrow's demand in Aerospace and Defence. We take pride in the high level of services and solutions we provide to all our customers across all sectors.

Safety & Quality

We are committed to the highest standards of safety and quality in everything we do

Collaboration

We enable our people to work seamlessly across geographies and functions towards mission accomplishments

Customer Focus

We are committed to listen to our customers needs and strive to achieve customer experience excellence

Support our People

We embrace diversity, develop and retain our people with competences to create new value

Build an organization with Integrity

We are uncompromising in our ethical behavior and protecting our company culture, which foster trustworthiness with one another, our customers, suppliers and strategic partners

Technical Tool Services: calibration, proof load testing, annual servicing

Major OEM customers:

- Airbus Defense & Space (Tier 1)
- Airbus Helicopters (Tier 1)
- BAE Systems (Tier 1)
- Boeing Aircraft Tooling Licensee
- Bombardier
- Collins Aerospace
- Lufthansa Technik
- Rolls-Royce
- Rolls-Royce Naval

In addition to the OEM approvals, we proudly support the majority of major Airlines and MRO's around the world with manufactured licensed aircraft tooling and GSE.

Refer to our website for more information

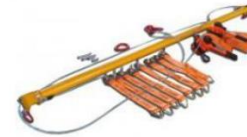

Our Business - AEROSPACE

Field International is proud to be one of the top selling Boeing tooling licensees. We manufacture, calibrate, repair and supply tooling for the complete Boeing range of aircraft. We have recently enjoyed huge success with manufacturing B787 tooling by converting sales of 70% of quoted tooling to the Airlines and MRO.

FIL 8400

FIL 8400 is the only Airbus approved A380 landing gear removal / installation tool

FIL 8100

FIL 8100 is the only Airbus approved A330-A340 landing gear removal/installation tool

FIL 3300 – Oil Migration Tool

Designed and developed following a request by Airbus.

The tool measures the amount of oil leakage through the landing gear seals, enabling maintenance organisations to accurately determine when the landing gear oil seals need to be replaced.

This has reduced the unnecessary replacement of the seals and prevented downtime and cost.

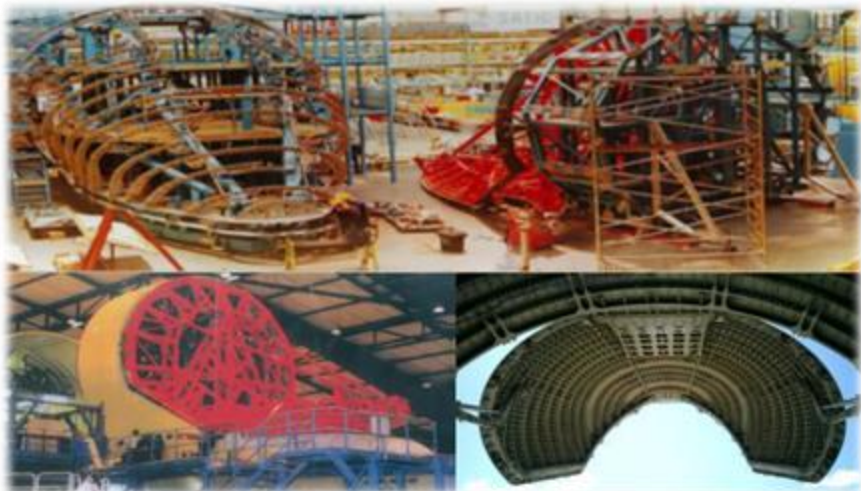

FIL 8700 – A380 Air Generation Unit Installation & Removal Trolley

Engineered Solutions

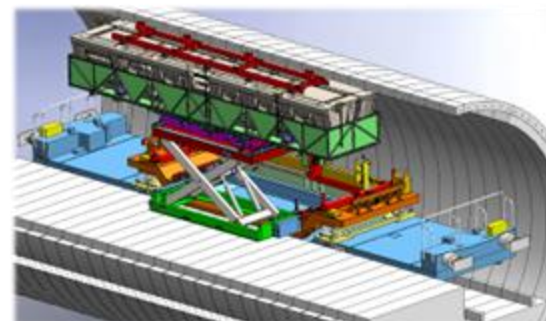

Beluga Door, Tooling Design, Manufacture & Installation into 1st Aircraft

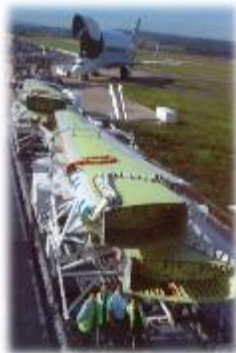

TUV London Underground

Air Conditioning Unit
Removal/Installation Tool

A320 Wing Transportation Jig

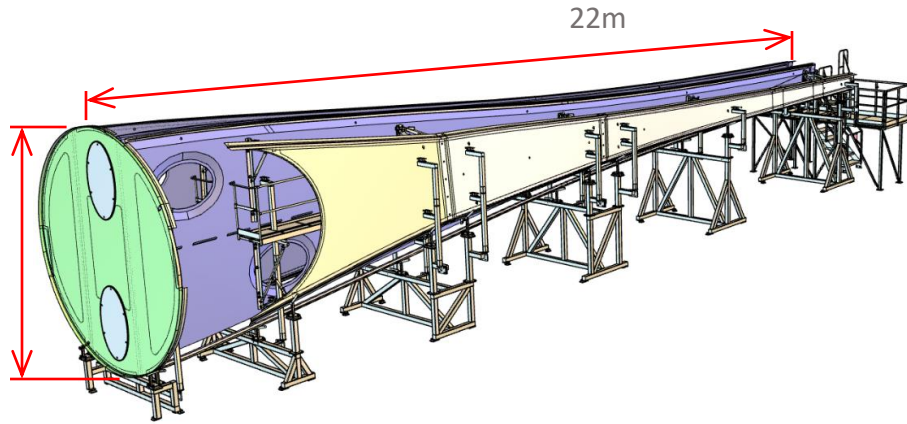

Field successfully re-designed and manufactured the jigs reducing the weight of the originals by 52% enabling Airbus to transport two sets of A320 wings in the Beluga aircraft.

Design, manufacture and Installation of Second Stage A320 Skin Panel Jig in Broughton, Wales UK.

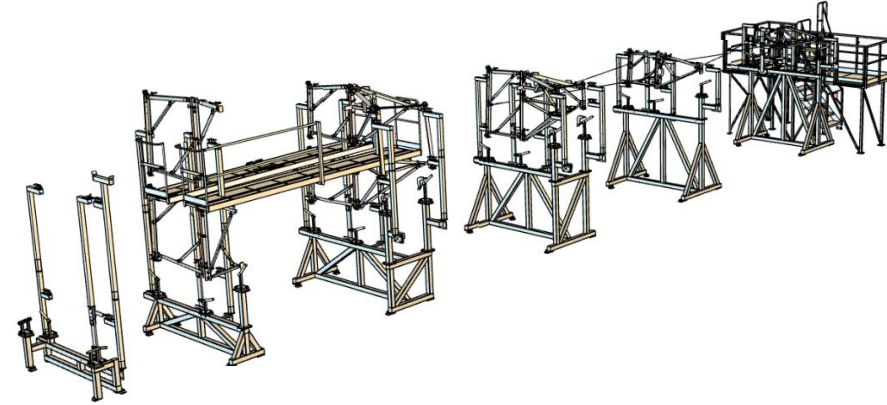

Vestas Design & Build Project

Assembly Jig, to position reinforcing Webs ready to assemble into 80m wind turbine blade.

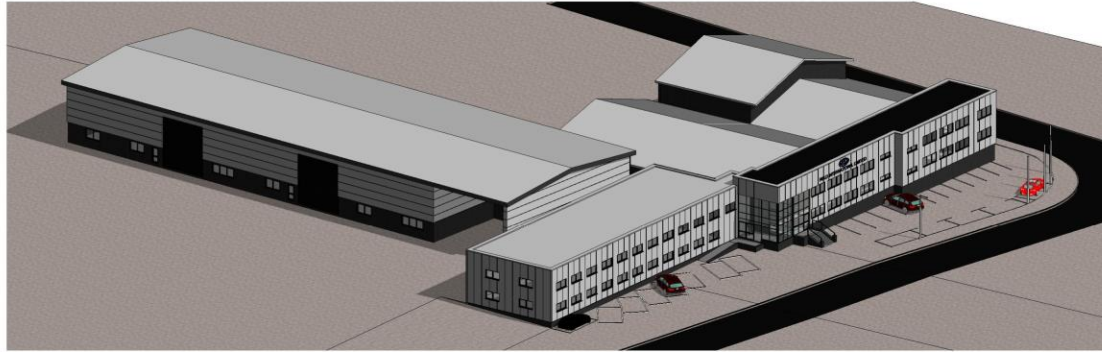

Jig overview, loaded with Webs
